Product Description

Edge 205 has been designed specifically for the cyclist with focus on form factor, feature set and GPS sensitivity. The Edge includes a new highly sensitive GPS receiver to satisfy the trainers demand for extremely reliable and accurate data. This unit performs in the most challenging of conditions, whether used next to big city skyscrapers or in valleys under heavy tree cover. The Edge 205 is geared towards the recreational cyclist. This training device mounts on the stem or handlebars and includes routing capability and advanced workouts. The Edge design includes a large, 4-level grayscale display allowing for increased readability and customization of user interface and is powered using internal, rechargeable Li-ion batteries.
