Product Description

Edge has been designed specifically for the cyclist with focus on form factor, feature set and GPS sensitivity. Both models include a highly sensitive GPS receiver to satisfy the trainer's demand for extremely reliable and accurate data. Lightweight and waterproof, Edge accurately monitors pedaling cadence and/or heart rate, vertical profiles, climb and descent, altitude, temperature, speed, distance and time. The design includes a large, 4-level grayscale display allowing for increased readability and customization of user interface and is powered using rechargeable Li-ion batteries.

Accessories

010-10645-00	753759050047	Heart Rate monitor
