Product Description

The Foretrex 201 is a wearable Personal Navigator for the outdoor enthusiast. Built rugged for adventure, this wrist-top device is perfect for hikers, campers and climbers who want a useful GPS in a lightweight, waterproof, and affordable package.

The Foretrex 201 combines the form factor of our personal training system, the Forerunner 201, with the GPS navigation features of the popular Geko 201 plus an additional timing feature. This feature is especially designed to meet the timing needs of dinghy/sailboats racing, but it is also configurable and could be useful to other sports. The Foretrex 201 offers hands-free GPS navigation information, allowing you to concentrate on your outdoor activities.
