Features

- High-sensitivity GPS receiver
- Built-in basemap with shaded relief
- MicroSD card slot
- Up to 14 hours (typical use) on two AA or NiMH batteries (high-end)
- Innovative Rock 'n Roller input wheel
- Wireless data exchange between units

Product Description

This rugged unit with a high sensitivity receiver offers unique features such as a new Rock 'n Roller wheel for one hand operation as well as the ability to exchange waypoints, tracks, routes and geocaches wirelessly between units. In addition, you can customize your Colorado with five different user profiles: automotive, marine, recreation, fitness or geocache. The SD card slot on the bottom of the unit is ideal for loading additional map detail. The Colorado's detailed mapping and high-resolution color display make your experience on the land or water worthwhile. It is simple to load optional maps for different types of adventures using the SD card slot or 384 megabytes of internal memory.
